DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Claims 23-56 are allowable in light of applicant's arguments filed on January 12, 2006. Since 25, 31 and 41 have been withdrawn for the examination due to species election, now the examiner rejoins claims 25, 31 and 41 with claims 23, 24, 26-30, 32-40 and 42-56. The rejection under 35 USC 112, second paragraph in previous office action has been withdrawn since applicant indicates that "transport mechanism" recited in claim 23 is only limited to a device and is not a process (see applicant's remarks filed on January 12, 2006, page 2, last paragraph). The closest prior art in the record is Bienhaus *et al.*, (US Patent No. 5,746,978, filed on July 17, 1997). This prior art does not teach an amplification station to receive a reaction receptacle containing the separated target nucleic acid (see applicant's remarks filed on January 12, 2006, page 2, second paragraph). This prior art either alone or in combination with the other art in the record does not teach or reasonably suggest an automated system which comprises all of the limitations recited in claim 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30
